② Purple means the device is not connected. Blue means the device is connected with router and the signal is good. Orange means the device is connected with router and signal is not weak.

**2** **WIFI Signal Exp anding(R epeater) theor y description**

The coverage of wifi router in the market usually can not meet the family need. And the walls in the house greatly reduce the router WIFI's coverage. So we need a wireless range extender to extend the signal from the router.

Wireless Router · Repeater · A · B

Attention: As it shown, if your router effective coverage is in A place, you can expand the signal to B place with using COMFAST brand repeater in A place.
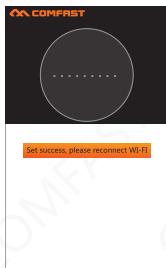

3 Software Settings

3.1 Use mobile to connect wifi signal "COMFAST-XXXXXX"; Open the browser and enter 192.168.10.1, then get into the login page. Choose defaulted language "English" and input defaulted password "admin", and then click "login" to get into the setting page.
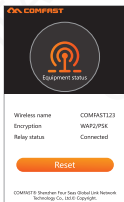

3.2 After login, the device will automatically scan the wireless signal which is available.

Scanning wireless signal···
Please wait TWO seconds.

Wireless name	state
